- UI/UX design
- Prototyping
- Interaction design
- Digital art

Soft skills

- Problem-solving
- Collaborative
- Willingness
- Independent
- Attention to detail
- Organized
- Flexible

About me

I am a **multimedia design student** with interests in aesthetics and user experience design. I enjoy combining **problem-solving** and **creativity**, and through projects I have gained a good understanding of how to **design intuitive** and **aesthetically** pleasing web and mobile user interfaces. I tackle every project with an **open mind** and **organised approach**, and my driving force is creating digital solutions that get the balance between design and usability right. **I am eager to be a part of a team with passion and innovation**, while continuing to learn and contribute to creating great user experiences.

Education

Multimedia Design - Business Academy Aarhus

19.2024 - ongoing

The Multimedia Design degree has a heavy focus on designing and developing user-friendly digital interfaces, combining UX concepts with front-end development. The degree course is project-oriented, which gives me the chance to work together with others and develop real-world solutions.

Higher Preparatory Examination (HF) - Aarhus Akademi

2021 - 2023

HF is a two-year upper secondary education program in Denmark that provides access to higher education. It's similar to havo.

Projects

Steno project

Created an interactive digital storytelling experience for the Steno Museum in Aarhus, using HTML, CSS and JavaScript.

ZeroBuzz Brew project

Developed a fictive webshop through an interactive prototype, focusing on JavaScript, User Research and User Testing.
